Sample Candidate A (Data Scientist)

Candidate Profile - Data Science | candidate.datascience@sample.local | github.com/sample-portfolio-ds

PROFESSIONAL SUMMARY

Data Scientist with 3 years of hands-on experience developing statistical machine learning models, data pipelines, and business intelligence dashboards. Proficient in Python, SQL, Pandas, NumPy, Scikit-Learn, Statistics & Probability, and Data Visualization.

TECHNICAL SKILLS

- Programming Languages: Python, SQL
- Data Science & AI: Pandas, NumPy, Scikit-Learn, Statistics & Probability, Data Visualization
- Visualization & Tools: Plotly, Matplotlib, Git, Linux
- Secondary Competencies: TensorFlow, Docker, REST API

WORK EXPERIENCE

- Associate Data Scientist | Apex Data Systems (2022 - Present)
- Engineered churn prediction models using Scikit-Learn achieving 87% accuracy.
- Constructed automated data cleaning and aggregation pipelines in Pandas and SQL processing 2M+ records daily.
- Collaborated with cross-functional stakeholders to deliver interactive Plotly executive dashboards.

EDUCATION

- Bachelor of Technology in Computer Science and Engineering | State Technical University (2018 - 2022)
- Relevant Coursework: Machine Learning, Statistical Methods, Database Systems, Data Structures

KEY PROJECTS

- Customer Segmentation Pipeline | Python, Pandas, Scikit-Learn, Plotly
- Designed an unsupervised clustering system using K-Means and PCA to group 50,000+ retail customers.
- Financial Fraud Detection Engine | Python, Scikit-Learn, SQL
- Developed classification model addressing class imbalance via SMOTE, reducing false positives by 22%.
